

Press Release

EVAC Vacuumtoilet on board of new Japanese Cruise Train „TRAIN SUITE Shiki Shima”

Wedel, 19. June 2017

The Cruise train “TRAIN-SUITE Shiki-Shima” - operated by East Japan Railway Co. (hereinafter referred to as JR EAST) has started the service since May 1 2017. The futuristic looking train has been designed by Mr. Kiyoyuki Okuyama, famed for his work with such as Porsche, Ferrari and several bullet trains. This train – a rolling 5 Stars Hotel – provides highest comfort and greatest convenience. In using top-of-the-line materials and hiring top designers such as Okuyama, the company seems to have spared little expense, paying great attention to even the smallest details.

The 10-car train accommodates just 34 passengers in total of 17 suites. Each suite consists of living room, shower, individual luxurious washroom and EVAC Compact Vacuum-Toilet. The lounge car is also equipped with an EVAC Compact Vacuum-Toilet. In total there are 18 Compact Toilets (17 units installed in suites, one unit in the lounge area) and one E2000 System (in the Dining-car) on board. Every toilet is nano-coated and equipped with a multi-functional washlet.

JR East trusts the safe and secure EVAC Vacuum-Technology, because it is one of the most reliable systems in the world. EVAC Solutions have been known for outstanding reliability, efficiency and low maintenance. As the world’s leading provider of complete integrated sanitary systems for trains. EVAC has been generated state-of-the-art components with “built-in” field experience of about 80.000 vacuum systems installed worldwide.
