For more than 40 years, Evac solutions have been known for outstanding reliability, efficiency and low maintenance. As the world’s leading provider of completely integrated sanitary systems for trains, we have been generating state-of-the-art components with “built-in” field experience of about 80,000 vacuum systems installed worldwide—and counting.

With extensive expertise and rigid quality assurance, we develop and integrate high-class components into wireless systems that, just like railways, are much more than the sum of their parts—individually tailored for the demands and conditions of vastly different markets in many countries. Introducing a maximum level of performance and stability into any system while using minimum resources and space is our day-to-day business. This is why integrating Evac is integrating excellence.
Evac Compact
One unit. All components. Full flexibility.

System Design
Saving space as well as resources, this microprocessor-controlled, all-in-one unit features a local vacuum system, removing the need for a vacuum-proof waste water tank. It is available with both sliding gate valve and pinch valve. Use depends on customer preferences and specifications. The customer has a choice between sit-down, squatting pan and urinal styles.

Super efficient at just 0.5 l water per flush and engineered to ensure optimum performance using small tank volumes, the Evac Compact is an excellent and economical stand-alone solution. Its integrated fault detection and trouble shooting as well as super-easy installation and maintenance make it a worry-free system. The entire unit can be replaced within 10-15 minutes.

After flush activation a vacuum is created in intermediate tank
The bowl is rinsed
Bowl contents are discharged into intermediate tank
Pressure is increased to transport contents of intermediate tank to waste water tank

INTEGRATING SERVICES
As the partner of choice for demanding clients all over the globe, Evac is sure to have the right answer to your needs – whenever you are from small repairs to complex re-configurations, from customized spare-part concepts to building your own service depots. Do you want to learn more? Just give us a call at +49 4103 9168 0

» Fast and straight-forward on-site assistance – worldwide
» Optimum availability of all products and parts at all times
» Tailored service concepts with guaranteed availability levels
» Sophisticated and highly responsive logistics
» Technical support during installation and commissioning
» Full after-sales service including maintenance, workshops and training sessions as well as advice on cost-efficient modernization and optimization of existing systems

Evac Compact Vacuum Toilet System
**Evac Compact**

One unit. All components. Full flexibility.

**System Design**

Saving space as well as resources, this microprocessor-controlled, all-in-one unit features a local vacuum system, removing the need for a vacuum-proof waste water tank. It is available with both sliding gate valve and pinch valve. Use depends on customer preferences and specifications. The customer has a choice between sit-down, squatting pan and urinal styles.

Super efficient at just 0.5 l water per flush and engineered to ensure optimum performance using small tank volumes, the Evac Compact is an excellent and economical stand-alone solution. Its integrated fault detection and trouble shooting as well as super-easy installation and maintenance make it a worry-free system. The entire unit can be replaced within 10-15 minutes.

After flush activation a vacuum is created in intermediate tank

The bowl is rinsed

Bowl contents are discharged into intermediate tank

Pressure is increased to transport contents of intermediate tank to waste water tank

**General Technical Data**

- **Approx. 18 kg**
- **Approx. 28 liter expanded air per flush**
- **24 V DC (+/- 30 %)**
- **EN 45545**
- **2.2 W (standby) – 12 W (operational)**
- **Approx. 0.5 liter per flush**

**Consumptions**

- **Approx. 2 liter expanded air per flush**
- **Approx. 0.5 liter per flush**
- **0.2 W (standby) – 12 W (operational)**

**How it works**

- After flush activation a vacuum is created in intermediate tank
- The bowl is rinsed
- Bowl contents are discharged into intermediate tank
- Pressure is increased to transport contents of intermediate tank to waste water tank

**Consumers and Maintenance Products**

- **Flush water additive**
  - Preventing lime deposits as well as blocked pipes.
  - Fresh water, grey water or waste water: Based on Evac’s unrivalled expertise and experience, our dedicated engineers are up to any challenge when it comes to designing durable, cost-efficient tank solutions as well as custom-made frames with minimum space requirements.

**Integrating Services**

As the partner of choice for demanding clients all over the globe, Evac is sure to have the right answer to your needs – whenever you are: from small repairs to complex re-configurations, from customized spare-part concepts to building your own service depots. Do you want to learn more? Just give us a call at +49 4103 9168 0

- Fast and straight-forward on-site assistance – worldwide
- Optimality-availability of all products and parts at all times
- Tailored service concepts with guaranteed availability levels
- Sophisticated and highly responsive logistics
- Technical support during installation and commissioning
- Full after-sales service including maintenance, workshops and training sessions as well as advice on cost-efficient modernization and optimization of existing systems.

Evac Train
- Compact Vacuum Toilet System

General Technical Data
- Approx. 18 kg
- Without seat: 540 x 365 x 373 mm
- 24 V DC (+/- 10 %)
- 2.2 W (standby) – 12 W (operation)
- EN 45545

Consumptions
- Approx. 20 liter expanded air per flush
- Approx. 0.5 liter per flush
- 0.2 W (standby) – 12 W (operation)

Accessories and Maintenance Products
- Flush water additive
  Preventing lime deposits as well as blocked pipes. From illustration as well as with clear box resealable sachets, are designed to improve cleaner and longer-lasting performance of the entire sanitary system. Simply pack fluid, a small amount of additive, into the water by a dosing pump.

- Enviroclean as well as EVACclean Eco (without biocides) are designed to improve cleanliness, performance and longevity of the entire sanitary system. During each flush, a small amount of additive is added to the water by a dosing pump.

Product Overview
The vital ingredient for truly exceptional results

- Every single product designed to meet highest technical expectations
- Continuous innovations and updates guarantee future-proof investments
- All products extensively tested and tailored to our clients specifications

Ejector
Controller
Enviroclean pump
Intermediate tank
Sliding gate valve
Water pressurizer
Shroud
Pinch valve
Sliding gate valve

Water & Waste Systems
- Control & Communication Systems
- Cabin Modules
- Cabin Interiors
- Treatment Systems
- Vacuum Toilet Systems

Both Evac sliding gate valve and Evac pinch valve can be used.

» After flush activation a vacuum is created in intermediate tank
» The bowl is rinsed
» Bowl contents are discharged into intermediate tank
» Pressure is increased to transport contents of intermediate tank to waste water tank

Service Terminal
With its well-designed graphical user interface, intuitive usability and fast data transfer, our terminal software makes it easier than ever to check system functionality, perform day-to-day maintenance tasks and keep an eye on all relevant parameters and statistics.
Evac Train – Integrating Excellence

For more than 40 years, Evac solutions have been known for outstanding reliability, efficiency and low maintenance. As the world’s leading provider of completely integrated sanitary systems for trains, we have been generating state-of-the-art components with “built-in” field experience of about 80,000 vacuum systems installed worldwide – and counting.

With extensive expertise and rigid quality assurance, we develop and integrate high-class components into seamless systems that, just like railways, are much more than the sum of their parts – individually tailored for the demands and conditions of vastly different markets in many countries. Introducing a maximum level of performance and stability into any system while using minimum resources and space is our day-to-day business. This is why integrating Evac is integrating excellence.
