

## Serviceterminal - PC Version Classic View

- The Serviceterminal - PC Version is a maintenance software for Evac vacuum toilets. It provides the following functions:
  - Removal of blockages
  - Error log reading
  - Flush cycle counter
- Two different views are freely selectable, depending on user preference
- Classic View based on EVAC handheld service terminal
- Optimized for Windows 7

## Serviceterminal - PC Version Modern View

- Clear layout with icons for intuitive interaction
- Simplified valve control function using graphical user interface
- Event counter results and toilet parameters in the overview for increased transparency
- Fast and easy data transfer offers the customer the possibility for individual preparation and compiling statistics
